Pictures World As Wild Jungle

David Lloyd George Declares Only Christian Church Can Prevent Another War

LONDON, Oct. 9 (C. P. cable) The world as a jungle "with the nations prowling through it, snarling and baring their teeth at each other," was pictured Monday by David Lloyd George, as the congregation of City Temple welcomed Rev. F. W. Norwood back from his world tour.

Nothing would save the world except what was once called "the foolishness of preaching," the picturesque Welshman in an address tingling with impatience of indifference and acquiescence. He saw nothing that could prevent war except the Christian church.

"At any moment a mistake gesture of misunderstanding may make them spring at each other's throats," he said, carrying on the jungle metaphor. War would not come just yet, but there was "only just time to prevent it. The forces of peace must be mobilized

Governments did not want war, and it was time organized Christianity should make an impression on the world's statesmanship. The message for today was exactly the same message as that delivered

Wheat Pool

GUARANTEE IS BEING MET

Announcement has just been made that the Alberta Wheat Pool for the third successive year has met the maturing obligations in full together with interest due to the Provincial Government in connection with the 1929 Wheat Pool overpayment.

At the time the government guarantee was agreed upon there was considerable misgiving as to the ability of the pool to make repayment in view of conditions in the wheat market. The record of repayment to date is reassuring. The pool has been doing a fair share of the grain business of the province.

It will be a most desirable outcome if the pool can pay off the government guarantee and thereby re-establish the equities of thousands of farmers in the big line of elevators.

—Calgary Herald

ed twenty centuries ago, when the world was situated almost as it is today, just recovering from the devastation of cruel wars. "I am beginning to lose faith in conferences," he said. "Too often they are prearranged.

The Practical and The Ideal!

Alberta Pool Elevators is a creation of the agricultural co-operative movement and as such is closely knit to the families on the land who believe in and act upon the principals of co-operation in order to better their condition,

Commercial success is highly important but it is to be regarded only as a means to an end—the improvement of the living conditions of rural people.

The major function of this extensive country and terminal elevator system owned by Alberta farmers is to give support to their natural aspirations for a more secure rural tenure.

Both the practical and the ideal sides of the farm movement are united in Alberta Pool Elevators and on this basis a general appeal for support is extended to all grain growers.

Alberta Pool Elevators

Local Newslets

Mrs. Kerby and baby, of Hanna, spent Thanksgiving at the home of her parents, Mr. and Mrs. Jas. Young

Miss Ruth Bowd spent the Thanksgiving with her sister, Mrs. A. Youell, of Saskatoon.

A Thanksgiving dinner was given at Mr. and Mrs. P. Gange of Clemens district, Mr. and Mrs. Osterberg, Ferny Courts Wendell Punny, Guven Bunny and Monica were guests. A very pleasant time was spent.

Mr. and Mrs. Archie Mason of Rearville district, arrived back to make preparations for moving to a new location north of Edmonton.

Miss G. Bunney arrived back after spending the last few months at Duchess.

Miss Marguerite Co-d and Miss Norma Melon, of Youngstown were Chinook visitors on Thanksgiving day.

The Municipal Secretary will be at Wm. Wilson's home Friday from 10 to 130 and then at Heathdale P. O. from 2 o'clock to 5:30 to take applications for Relief, Oct. 14th.

Miss Northcot, of Empress, visited with Miss Duff at the Myrtle Teacherage.

Mr. and Mrs. W. H. Butts and family, of Hanna, spent Thanksgiving with Mrs. J. L. Massey.

...

Alberta Wheat Pool payments to the provincial treasury on the Pool's bonds held by the government have been brought fully up to date, it was stated by treasury officials Saturday. A remittance from Calgary headquarters of \$453,425 being the third annual payment on principal and interest was made this week and brought about the satisfactory situation. A portion of the Pool's payments is applied each year to sinking fund account.

Mrs. S. A. Wilton visited with Mrs. Osterberg on Tues.

Mr. and Mrs. John Lucas of Toronto, who has been visiting with Mr. and Mrs. H. E. Robins n left on Monday for the East

Mr. W. H. Meade' of Natal, B. C. was a Chinook business visitor this week.

Mrs. W. H. Davis graduate nurse specializing on Maternity cases Has C. M. B. of London, England. Also gives massage treatments for rheumatism and neuritis. will take patients in her home at reasonable price.

The weather at present is ideal and the farmers are at last getting on with their harvest work. We seem to be getting the two extremes, during the month of September the weather was cold and at the present time it is warm.

On Friday, Oct. 12th, 8 p.m. a Missionary address will be given at Collholme Nazarene Church, by Mrs. Lulu Schmelzenbach who has recently returned from Swaziland So. Africa, where for many years she and her husband, the late Rev. Harman Schmelzenbach, labored among the Swazis

This address will be of great interest to both adults and children as Mrs. Schmelzenbach spent over twenty years in Africa and has had a wide and varied experience.

The Leader for Over Forty Years

"SANTA" TEA

"Fresh from the Gardens"

The Forty-Ninth Parallel

An interesting and thought-provoking editorial article appeared recently in a popular magazine which circulates extensively throughout Canada and the United States. Its subject was the forty-ninth parallel across the world. The people of the North American continent regard it as an imaginary line which marks the boundary between the United States and Canada, but, says this magazine editor, the wise ones of the earth regard it as something more than a hair line on the earth's globe. It is, he says, the world's line of destiny.

Elaborating his theme he first directs attention to the fact that in America this invisible international boundary line is a line of peace. No frowning fortifications dot its length; no jealousies are pored up along its borders; no racial hatreds batter its boundaries. For more than one hundred years it has been a line of peace, a magnificent contradiction of the Old World's barbaric philosophy that two neighboring countries cannot long exist without strife.

But tracing the course of the forty-ninth parallel around the globe, he finds that the symbol of peace in North America becomes the blood-drenched line of strife throughout Europe and Asia, cleaving through the very heart of the world's worst trouble zones. He continues:

"The line of peace, upon spanning the Pacific, marks the frontier of Asia's powder magazine—the northern boundary of Manchukuo. On one side the armies of the Soviet maintain their well armed vigil. On the other Japan bides her time in the puppet state that typifies her first triumphant toe-hold on the mainland of Asia.

"Travel with the 'line of peace' across the flux and change of the new Red Russia and note its sinister significance as it pierces the inner core of European turmoil. It traverses the Polish Corridor, constant source of statesmen's uneasy slumber; flanks Austria's troubled boundaries; bisects a re-armed Germany; skirts the fringe of France at the most jealous point of national pride, Alsace-Lorraine; tops the rims of armored steel that mark Belgium's sullen frontiers; then wings the Atlantic for its more pacific mission on this continent."

And he asks why should this "line of peace" assume such a devilish personality in its travel round the globe, and finds the answer in the character of the nations it touches rather than in the nature of the line itself.

All of which is true. In North America the two adjoining nations are peopled by those who speak a common language and who, although there has come a great intermingling of many races, still trace their main descent to one racial source and have proved their ability to, in large measure, assimilate those newcomers of many races and all have largely forgotten, or dropped, the old animosities, suspicions, jealousies and hatreds of by-gone centuries which are nourished and kept alive in the countries of the Old World.

America is fortunate in this, and stands as an object lesson to all other lands. This being so, have we been as good neighbors as we ought to have been; have we taken full advantage of and reaped all the benefits that should have been ours as a result of our preferred position? True, we have kept the peace in a physical sense in that we have refrained from war, and the insensate folly of building up huge armaments on against the other on the false assumption that only through such so-called "preparedness" can peace be maintained.

But the forty-ninth parallel across North America is not quite the imaginary line it might well have been to the advancement and benefit of people living on both sides of it. There are no forts, but there are all too many legislative barriers imposed along its entire length by both countries, barriers on the one side being duplicated by similar barriers on the other side.

We build our roads on both sides to meet and merge at the boundary line; we construct our railways to the same gauge in order that trains may move without pause from one country to the other; without trans-shipment of passengers or goods; the ether waves flow uninterrupted across the line carrying radio messages to and fro, and the same is true of the telegraph and telephone; our books and newspapers, our automobiles, our crosses and re-cross; our mails move without restraint or loss of time; our trades unions are international in their character; so, too, are our fraternal societies and service clubs; our sporting organizations vie with each other on common fields.

Being so favored, and having done so much to promote our common interests in so many ways, and having developed an international friendliness unknown elsewhere, and having utilized all that science and invention has bestowed in order to promote this fine and mutually advantageous intercourse, why have we proceeded to erect artificial barriers to check and stop the flow of trade which all these other agencies have been perfected to encourage and develop? The people of both countries are deemed to be highly intelligent; they are not inmates of lunatic asylums. Then why have they acted so absurdly as to hamper and cripple that which they have spent untold millions of money and energy to encourage?

There is only one answer, and that answer is to be found in the cupidity of man individually and collectively, on both sides of the "line of peace." Nature designed that the northern half of this great continent should be the complement of and to the southern half. The Maritime Provinces with their resources are the natural complement of the Atlantic seaboard States; Quebec and Ontario are the complement of the Central States; the Prairie Provinces are the complement of the middle western States right down to the Gulf; British Columbia is the complement of the Pacific coast States. Yet many man tries to defy Nature and, as a result, has made a sorry mess of things throughout the whole realm of trade and commerce, finance and economies.

The forty-ninth parallel across North America is a splendid object lesson to all nations except in this one respect. Let these two great peoples do the sensible thing and set another object lesson for and provide leadership to a world now suffering because of the wholesale destruction of international trade.

Plenty Of Color

If it's a color you want, says the Edmonton Journal, a new "dictionary" just published by the British color council, ought to fill the bill. With 220 shades given in color and supplied each with a name, it should now be possible to "match" a stocking or a bit of wool for your wife or even to give an exact description of the most variegated of sunsets.

Would Conserve Moisture

Immediate international action to save Western Canada from more extensive drought damage was held necessary by Sheriff Malcolm McGregor, of Brandon, when he returned from a 3,000 mile motor trip through the prairie provinces. He recommended damming of rivers until they hold the normal running flow of an average crop year.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhea, the vomiting and puking to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 88 years.

Richest Street In World

Shops Of Curio Dealers In Delhi, India, Contain Many Treasures

What is the richest street in the world? Without taking into account the environs of the Stock Exchange and Wall Street, where western fortunes change hands, the little-known Chandi Chowk in Delhi has substantial claims. It has often been referred to as the richest street in Asia, and, unlike our own commercial thoroughfares, the greater part of its wealth is there for all to see. But many are the treasures which are hidden away in secret recesses of the shops of curio dealers and jewelers in that picturesque street. One of the dealers, the walls of whose establishment are covered with letters of appointment from Highnesses and Excellencies of all descriptions, has manufactured countless wonderful golden and jeweled emeralds for crowned heads and ruling princes. He was responsible for the historic peacock gown, costing no less than one thousand pounds, which the late Lady Curzon wore at the Durbar Ball, attended by four thousand guests in the Delhi Fort in 1908. Here also are all the richest of the embroidery merchants, whose robes and cloaks, shimmering with costly ornaments, are not only intended for reigning princes, but for State elephants. Here, too, are the carvers of ivory, and the traveler can see them exhibiting their skill in evolving delicate figures and animals from solid blocks of ivory, sawn from elephants' tusks.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search For a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try, but I was in a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever—three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."—(Mrs. A. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.)

Mistook Ducks For 'Plane

Phantom plane was sought at Hove, Essex, by hundreds of people who spent an all-night vigil looking for a mysterious 'plane that was supposed to have fallen into the sea at dusk. The "plane" was proved to have been a flight of ducks diving for fish.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When you feel listless, depressed, run on the edge, that's your liver which isn't pouring the daily two pounds of liquid bile into your bowels. Bile is the natural cleanser of the system. Food is accumulating and decaying inside you and making you feel fretful. More bowel-movers like salts, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough. You need a liver stimulant. Carter's Liver Bile is the best one. Safe. Purely vegetable. Ask for them by name. Refuse substitutes. 25c. in all drug stores.

Is Reaching Danger Point

Many persons seem to think that the spending possibilities of the Government are limitless, but they lose sight of the fact that every dollar appropriated for public purposes has to come from the taxpayer. What they also forget is that there is a danger line in taxation which is reached when the levies become so oppressive that they cannot be collected.—Philadelphia Inquirer.

The Cross-Word Puzzle

The cross-word puzzle, which began before the jig-saw puzzle, seems destined to have a longer life. It is remarkable that it finds a place in such grave publications as the London Times, the Manchester Guardian, the New Statesman and Nation, and the Spectator and the Observer.

Germany contains more than 2,500 youth hostels. These hostels are provided as an overnight stopping place for young hikers.

Radio Instruction

The Saskatchewan Government Correspondence School—Radio Broadcasting 1934-1935

The programme of Radio Instruction given by the Saskatchewan Government Correspondence School during the past three years will be continued for the present school year. From Monday, October 15th, to Friday, December 14th, 1934 and from January 14th, to April 28th, 1935, a broadcast will be given daily, except Saturdays and Sundays, from four-thirty to five P.M. Mountain Standard Time.

The radio broadcasts will originate at CJRM, Regina, and the network will include the following stations: CFQC Saskatoon, CHAB Moose Jaw, CJGX Yorkton, CHWC Regina, CKBI Prince Albert.

The instructors will deal with the difficulties of pupils and will answer not only questions in the assignments but also questions that are daily reaching the School from teachers and pupils. In order to have a fuller appreciation of the addresses pupils are requested to have their Correspondence Lessons before them.

The following is the programme to be followed:

Even Sell Meat

Drug stores sell almost everything but, down in Florida, they have gone far beyond the variety of the stores up this way. A United States cruiser stopped at St. Petersburg and needed 15,000 pounds of fresh meat. The purchase was made at a St. Petersburg drug store.

Although Africa contains the widest variety of wild animals in the world, no tigers have been found on the continent.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons instead of their doctors'—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember this—And Always Say "Phillips'." When You Buy Your child deserves it for your own peace of mind, so that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. Each tiny tablet is the equivalent of a teaspoonful of the genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

MADE IN CANADA

Might Outshine Sun

Scientists Tell Of Heat Contained In Air Light Carbon

The hottest known thing on earth, we are told, is the burning carbon of an air light. It is so hot that volcanic mist forms in the incandescent crater, a fog of pure carbon vapor.

Formerly this fog was thought to be a liquid carbon, but a recent report to the American Chemical Society concludes that carbon does not pass through a liquid stage in turning from solid to gas, at least that it does not at atmospheric pressure.

This may be a reason why diamonds have been so impossible for man to make, says the report, for diamonds apparently are the products of a liquid form of carbon.

But, if diamonds cannot be produced from carbon, more heat and light can, it is hoped. Three Cleveland scientists who have been measuring the heat of the carbon arc declare that "under the right conditions, and with a little further chemical aid" arcs can be made to burn with an intrinsic brilliancy slightly greater than that of the sun.

This would be a novel achievement, indeed, the creation of an artificial light brighter than the sun! It sounds almost presumptuous.—Detroit Free Press.

Took Chance In Dark

Four Aviators Left 'Plane When Trouble Developed

"I just came down by parachute—where am I?" was the query a startled aviator got on the highway near Guildford, England, when he was stopped by an aviator waving a flashlight.

The aviator was one of three officers who had bailed out of a bombing plane at a height of 2,000 feet in the darkness. He got into the car and they went to look for the others.

A hundred yards farther on the car was stopped by another flashlight. Then a third light was seen across a field. It was that of the pilot, who had bailed out when the machine, which apparently experienced engine trouble, was only 500 feet up.

None of the four was hurt. Sixty per cent. of Japan's 1934 revenue goes to the army and navy.

Strange School In Cairo

Police Find Place Where Boys Are Taught To Beg

Police of Cairo, Egypt, have unearthed what they declare to be a school for beggars at which 100 small boys were taught the latest methods of the art. It was found following the arrest for begging of a ten-year-old lad who had been missing from his home for several weeks. The boy said that he was playing in the street when a smartly-dressed Egyptian offered to take him to his home and give him good food. The boy was taught how to beg, then detailed to a "pent" in the city. The police arrested the tutor and more than 100 children, most of whom had been anxiously sought by their parents. It is estimated the boys collected a total of \$50 a day.

A perfect home needle, 25,000 years old, was discovered by Jean Cauzessus in excavating at Ganties, in the south of France.

Ends a Cold SOONER

A MORNING WITH MRS. E. CONOMY

8 a.m. She makes up the children's lunches. "I was the sandwich in the Pan-Sani Heavy Waxed Paper," she says, "because I know that Pan-Sani will keep them fresh. In fact, I use Pan-Sani from the green box a dozen times each day for lining cake pans, keeping celery crisp and protecting food freshness and flavor."

9 a.m. She starts her dusting—but she no longer uses flinty, dusty cloth. She uses Wonder Paper, which does dusting, cleaning and polishing all in one simple operation. Wonder Paper is among her most recent discoveries. "It saves so much time," she says, "and keeps my furniture brilliant all the time."

10 a.m. Mrs. E. Conomy, while at her kitchen table, needs a sheet of waxed tissue to cover an opened jam jar. Presto-Pack, a clever pack of waxed tissue that hangs on the wall and yields one sheet at a time, delivers the sheet readily to her and she holds it on with an elastic band. Presto-Pack tissue has a hundred uses.

11 a.m. She prepares canals and onions for dinner. But she doesn't use two pots. She wraps each vegetable in Canapar Cookery Parchment, puts both in one pot and puts them on a low heat. Canapar keeps each vegetable nicely delicious in its own juices and eliminates all odors. "I use just one pot," she says. "Fats won't burn and I don't have to scour the pans. Cooking in Canapar also makes fish much more delicious and no odor escapes."

12 a.m. Her shelves need re-covering. She does that job with Hand-Roll, a 35-foot roll of paper. "Hand-Roll," she says, "is ever so helpful. I use it to line drawers, cover shelves, wrap parcels and dozens of other jobs that call for long sheets of paper."

THE TENDERFOOT

By GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward westward outfit.

Dad Kane, desert rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

(Now Go On With The Story)

CHAPTER II.—Continued

For a moment silence held both men. They knew the old foolish legend of the Mother Lode and they knew, too, that old desert rats like old Kane, believed in it while vigorously protesting their disbelief; that foolish old tale that says that all gold is fermented and thrown out from a central body as the human heart sends blood to the distant parts of the body and that the tiny veins of gold, if found and traced back to their origin, will lead to the great Mother Lode where gold is made.

"Mother Lode hell," quoth Dustin hotly. "Where'd you find this? Is it far from here?"

"Four days' travel even with them trained asses o' mine. Ever read yore Bible, Dustin? It's a good readin' in the Bible. It tells about a feller named Saul. He was a peach, too. He was a kind of a prospector same as me. He'd burros got loose same as mine done. He went to trail 'em and he found a kingdom. I done the same. Mine got loose an' I followed 'em up Red Water canon. . . . Look here."

He fished futilely in his pocket, withdrew his hand and swore wildly. Then he slapped every pocket.

"I've done lost it," he said hoarsely. "I put down all the directions in my notebook of course. It don't make no real difference. I can trail back here at night if I have to but I don't like losin' a notebook that tells about it all. I know I had it just before I seen Gray an' Corse with the wagon."

"Maybe they found it," suggested Dustin.

"It won't help 'em none if they did. I reckon. But I'd sure like to have it back. It's got all my accounts with you gentlemen in it. It was up Red Water canon like I said. . . ."

"That's on Hour-glass land," said Dustin fiercely.

"Who knows it if I don't? That was when I seen the wagon. I was comin' back from huntin' my stray burros when I stumbled on a piece o' good lookin' foot. I put it in my pocket and went back to trace the vein. I found the vein on the hillside and located it and come back. I was aimin' to build me a fire and roast the ore to see what it was like. I had made all the entries in my notebook like I always do. Then as I come over the ridge I seen the smoke and the wagon and then I seen the Broken Spur men at work on the Hour-glass cattle. They left and I made my camp in the bottom. Then I went back and looked into the matter o' the vein. I got out two little

sacks of ore. I'll assay two thousand to the ton or I'm a Mormon. . . ."

"Huh! You've been spendin' a lot of time locatin' a gold mine for old man Carr on the Hour-glass land," said Dustin sneeringly. "A minute ago you were accusin' us of stealin' the Hour-glass land. Now you're locatin' a gold mine on the same land and . . ."

"Minerals is different," said Kane hotly. "You know that. Even a cow-puncher knows that. This is a mine! Any man in the West knows minin' law. The man who finds a vein of ore kin follow it even under patented land. The only thing is the other man mustn't find it first. I've only got to prove that I was the first to find it."

Dustin nodded and Spike too. They knew that anomaly of law that is not justice at all at times.

"All the same," said Dustin, "it makes a difference. If Gray and Corse steal a few cattle, that's one thing. If you aim to steal a whole hillside full o' gold that's different. That's finance."

Kane swore gustily.

"Hour-glass or no Hour-glass," he said hotly, "I found the vein. I mean to follow that lead if it takes two plumb in to hell and I have to put with sulphur water hot from hell-fire."

"Old man Carr may be willin' to sell the mineral rights," said Goddard sarcastically.

"Don't be a fool. . . . Dustin's face was grave. "The minute you ask Carr about sellin' mineral rights, you as good as tell him what he's got. He wouldn't sell us a cup o' water to keep us from dyin' of thirst. Of course there's a way to get 'em. In fact, I can think of two ways right now. We've got to get those mineral rights and get 'em quick. . . . before the Hour-glass finds out about 'em."

"Joe Carr don't even suspect any ore on his land," said Kane.

"So much the better," quoth Dustin curtly. "You go on into the kitchen and get your supper, Dad," he said heartily. "We'll talk it over later. . . ."

He held his partner by the sleeve till old Kane disappeared into the kitchen. "Come on into the office, Spike," he said curtly. "I want to talk this over with you before old Dad gets back."

Spike nodded, shouted to the cook to bring some coffee to them in the office and followed Dustin into the room and closed the door.

CHAPTER III.

The moment the office-door closed, Dustin turned sharply on his partner. It was at once clear that Dustin was the dominant personality. He might defer at times to Spike because of that worthy's virulent tongue when aroused to speech but Spike's attitude showed that he was dominated and controlled by his partner.

"We've got to do something and do it quick," said Dustin. "Old Dad Kane is bound to talk. He just can't help it. And if once word gets out that he's found rich ore even on Hour-glass land, there'll sure be hell to pay. Red Water canon is clearly on the Hour-glass. I wish the old fool hadn't lost that note-book. I'm afraid to ask Gray and Corse about it. They'd double cross us in a second if they got wind of a find like this the old fool's made."

"Think old man Carr would sell if he's properly approached?" suggested Spike.

"Fuh. Would you sell if you were in his place? That's the answer. Even to mention the possibility of

buyin' the rights from him would make him post the ranch against trespassers. Where'd we be then? I'm not worryin' much about old Carr. I got him as good as sewed up in a sack with head and feet stickin' out. It's bigger than Carr, I'm aimin' at."

"Fuh. You talk like a fool," said Spike sharply. "How kin you say you got old Carr sewed up in a sack when you dassent even tie your pony to his tie-rack when you want to see that red-headed girl of his? You got the owner of the Hour-glass dead to rights? Huh. You make out to ride down to Seec to git the mail when there ain't no mail just 'cause you want to git another look at that red-headed Edith Carr. You make me tired."

For just one brief moment Spike Goddard stood on the bare edge of red tragedy. He saw in his partner's eyes such a glare of utter hate that he fairly shrank back at what he saw. For a full half minute Dustin stared at him fiercely, then he laughed. Spike drew a breath of relief.

"No use lookin' at me like you want to kill me," he said awkwardly. "I'm only tellin' you what all the Valley knows."

"About what, you damned fool?" snapped Dustin. "Of course old Joe Carr and I did have a row some three years ago. That was when your damned clumsiness got you caught messin' up with his cows. If I want to tie my horse to the Hour-glass tie-rack, I'll ask no man's permission. Get that? Put that in your pipe and smoke it."

"You'd like hell," snarled Spike.

"You'd be as welcome there as a rat in a prairie dog's hole. . . ."

That was just the one remark needed. Dustin exploded.

"And any time I happen to want Edith Carr, she'll come to heel and mind what I say and don't you forget it. . . ."

"I hear you. I heard a lot o' things I don't believe. That suit that you started over Soda Springs ain't any invitation to dinner at the Hour-glass."

"All right. Don't believe me then. There's more ways to reach a girl than by pettin' an' neckin' as they call it now."

"I hear you. . . ."

(To Be Continued)

Could Not Fool Officials

Opium Concealed In Chinese Hats Seized At Rangoon

Smuggled opium was discovered concealed in the rim of several thousands of broad-brimmed Chinese hats awaiting shipment to Rangoon. The railway station officials, observing the shipper's agitation, summoned the Excise staff who opened the consignment. Brand new hats were found, but the Excise staff were not satisfied and proceeded to inspect every inch of each hat. Round the brim of each hat a layer of opium, wrapped in tissue paper, was found. All the hats were found to contain a small quantity of opium. When discovered the man broke down and cried. He said that he and his family had spent a whole year in packing the opium in the hats, for which service they expected heavy remuneration.

Loch Lomond is the largest lake of Scotland, being 23 miles long, and its width varies from five miles to one mile.

Champion Bicycle Rider

The champion pedaller, a cyclist of Leeds, celebrated his jubilee on wheels. He has pedalled 340,000 miles, knows England like a map-maker, and thinks nothing of cycling 100 miles a day at 65. In 1911 he pedalled from Leeds to London, 195 miles in 12 hours, 36 minutes, and held record for 21 years. He began on a boneshaker, graduated to a penny-farthing, and has ridden every make since.

A BATTERY RADIO with Electric-Set PERFORMANCE

Here is the great invention every unwired home has waited for! Real electric set performance—tone quality, distance, ease of operation—and no more recharging of batteries!

The Air-Cell Radio will do everything that the finest electric set will do. It has been brought about by the invention of a marvelous new source of power—the EVEREADY Air-Cell "A" Battery. This battery breathes air and re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

AC102

Do not confuse the new Air-Cell Radio with the old type battery sets—Air-Cell Radio is new from the ground up—now being built by every leading radio manufacturer specially for Air-Cell performance.

Ask your dealer to demonstrate. Your interest will be well repaid.

Faster Way Found to Relieve Headaches

NOW PAIN OFTEN RELIEVED IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin cures even a bad headache, neuritis or rheumatic pain often in a few minutes!

In stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach. Aspirin tablets start "taking hold" of pain a few minutes after taking.

Canada Has Only High Grade Wheat Available, Says Dreyfus Firm Head

London, Oct. 1 (A. P.)—Leaders of the London grain trade and members of the international wheat advisory commission today ridiculed reports published here that "the biggest wheat corner in the world's history" was being prepared to control Argentine exports in an effort to break Canadian prices.

Most scornful of all was Miller Roland, manager of Louis Dreyfus and Company of London, which was accused of engineering the "corner" together with Bunge and Company of Antwerp, and the Mullers of Hamburg.

"It is a ridiculous scare story which is utterly impossible, both financially and technically," Roland said. In the first place all Argentine wheat exports are in sole possession and under the sole control of the Argentine government.

"Secondly there is no group in the world strong enough to take such a risk. Forty or fifty years ago a man named Leiter tried to corner the United States wheat market. Even in those days when the proposition was only a decimal point of what it would be today, the scheme broke Leiter.

"In the third place, Muller's Company no longer exists, and any tie up between us and Bunge is impossible. We are all in a dog fight in the grain trade nowadays, and that goes for Bunge and ourselves."

Official delegates to the wheat commission ridiculed the assertion that "this struggle was the real reason for the breakdown of the wheat conference in London". They pointed out that Canada and Argentina were the only important factors in the world market this year and were optimistic that both would obtain satisfactory quotas when the conference was resumed at Budapest November 20.

It was pointed out that lower prices for Argentine wheat in comparison with Canadian wheat were to be expected because of the inferior quality of the former.

CANADA'S DEFROSTING CHAMBER

A most important advance has been made in the handling of Canadian chilled and frozen products transported by ship and rail. The bogy of water vapor condensation has been laid. The Canadian Government has constructed a special vapor-tight chamber of 30,000 cubic feet capacity at the Port of London, England, for handling chilled and frozen meat. This chamber is the result of experiments conducted by Dr. L. E. Howlett, of the National Research Council of Canada, upon the defrosting of frozen foodstuffs and is operated by the Port of London authority. It is designed to prevent the condensation of water vapor from the outside atmosphere upon the product after removal from the ship's holds. Thus, one of the bugs in the transportation of frozen and chilled products has been removed.

Here and There

What a practical newspaperman finds interesting on a cruise around the world in the Canadian Pacific flagship Empress of Britain can be counted upon to capture the imagination of stay-at-home. Last winter Alan Maurice Irwin, a Montreal writer, made the cruise. He saw intriguing places, outstanding people and strange customs. So he set down and wrote a book which is illustrated by photographs he made with his own camera, filled with amusing sidelights upon humanity. Now, under the comprehensive title "and ships—and sailing way," the book is on Macmillan's fall list.

That United States investors' capital would flow into Canada in an even greater volume is the prediction of John R. Hastie, of the Mutual Life of New York office in Chicago, speaking before the Life Underwriters Association of Toronto, at the Royal York Hotel recently.

The cream of American baseball players is scheduled to sail from Vancouver October 20, aboard the Canadian Pacific liner Empress of Japan, for an all-star tour of Japan, China and the Philippines. Judge and Mrs. Kenesaw Mountain Landis may also be in the party.

Photographed in a group for the first time since they were "shot" on their arrival in Canada a few years ago, His Excellency the Governor-General, Her Excellency and their elder son and daughter were snapped on board the Empress of Britain just before Lady Beesbrough and her son and daughter sailed for Europe recently.

Appropriation of one dollar was made recently by the Vancouver City Council as the nominal price for the purchase from the Canadian Pacific Railway of 1 1/2 acres of right-of-way property at Kitsilano Beach, near the British Columbia city.

The first McIntosh apples of the season for distribution throughout the Dominion from Victoria to Halifax went out recently over Canadian Pacific lines in trains of 45 cars. The fruit is reported to be in wonderful condition and this season's product will maintain the great reputation that British Columbia has won for its apples.

Under the Canadian Pacific five years' free scholarship award to McGill University, Resid. McCullum, of Montreal; David B. W. Reid, of Winnipeg; and Albert Grant, Appleton of Lehigh, all sons of company employees, are announced as this year's winners. The scholarships are renewable every year up to five years if the holders are entitled to full standing in the next higher year.

"There is very clear evidence of a return to prosperity in Canada due to the greater feeling of confidence," was a recent declaration of Lord Ruffo, owner of more British trade papers than any other publisher in the United Kingdom, interviewed aboard the Empress of Britain.

From every state of the Union and every province of the Dominion delegates to the 119th communication of the Sovereign Grand Lodge of the Independent Order of Oddfellows assembled in convention at the Royal York Hotel, Toronto, recently. They were greeted by the Lieutenant-Governor of Ontario and the Mayor of Toronto.

Feed for cattle and horses in the drought area of Alberta will be purchased by the provincial government, it was stated by Hon. P. S. Grisdale, minister of agriculture, to the extent of a few thousand tons of roughage, for resale to farmers in these parts of the province. Buying will begin as soon as the feed is ready and approximately the same amount as last year will be required.

About \$7 a ton will be paid by the government, and arrangements have been made with the railways for free transportation. The fodder will consist of green oats, (in the sheaf) and some hay, and will be sold to the dry feed farmers at cost.

GOVERNMENT ESTIMATE OF CANADA'S WHEAT CROP

The Dominion Bureau of Statistics issued an estimate of Canada's 1934 wheat crop this week, placing the volume at 277,301,000 bushels. Last year's crop was 289,729,000 bushels. These figures, of course, include the wheat production of all of Canada. The figures for the prairie provinces were 268,000,000 bushels. By provinces: Alberta 116,000,000; Saskatchewan 114,200,000; Manitoba 38,000,000. Total 268,000,000.

Last year's production for the three prairie provinces is given at 250,841,000.

EXPORT EGG PROSPECTS GOOD

Canadian egg export prospects continue to command considerable attention and the first export shipment of the current year consisted of 1,000 cases, left Winnipeg last week (Sept. 8). This shipment is a little early and it is probable that the bulk of the exports will not start to move until the month of October. With the prospects for a substantial export trade this year and with the storage stocks apparently less than a year ago, the outlook for the egg market during the winter continues quite favorable. On the first of September, storage stocks at Montreal were above last year but at both Toronto and Winnipeg the holdings were lighter than in 1933.

A fair surplus of prairie chicken, grouse and partridges is reported in the city from country points, and conditions for this fall's shooting season are expected to be about the same as last year. Birds are said to be scarce in a few districts but plentiful in most. On the whole there will be an average supply.

The season opens on October 1 and continues to October 15, north of the Lacombe-Kerobert line, where the bag for prairie chicken and sharp-tailed grouse is 50 for the season and not more than 5 in one day. South of that line a bag of 25 only for the season is allowed.

Adjournment until sittings of the Alberta appeal court opening November 12, of the appeal in the Brownlie-MacMillan seduction case was granted this week on application of the MacMillans' counsel, Neil D. Maclean, K.C. The adjournment was asked on the grounds that the evidence was so extensive that court reporters had not had time, owing to the vacation period, to transcribe it.

It had been impossible to prepare the voluminous appeal book, Mr. Maclean explained. The adjournment was granted when no objection was raised by Mr. Brownlie's counsel, Chief Justice Harvey, Mr. Justice Mitchell, and Mr. Justice McGillivray were on the bench.

CHARTERED BANKS WILL ASSIST NEW INVESTORS IN REFUNDING LOAN

For the particular convenience of new investors who wish to subscribe in modest amounts for the bonds of the 1934 Refunding Loan, the chartered banks have agreed with the Dominion Government to loan up to 75 % of the par value of bonds purchased by new investors. For example, a \$100 bond may be purchased with a deposit of \$25; a \$500 bond with a deposit of \$125, and a \$1,000 bond with a deposit of \$250. In each case the balance of payments may be spread over periods up to six months, and the banks will carry the bonds at 4 per cent interest.

Refunding Loan

Ottawa, October 11.—The Prime Minister's frank concise statement regarding the 1934 Refunding Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labour leaders throughout the country. The concrete evidence of business recovery from the low point of last year which Mr. Bennett stressed in his opening announcement such as a 56 per cent increase in industrial production, 17 per cent increase in employment, 43 per cent increase in farm products prices, as well as a substantial improvement in car loadings, electric power production and wholesale prices, emphasizes the strengthening of the national credit, the progress in achievement of national economy and the steady general upturn in business.

Completion of this year's refunding programme will bring the total war loan refinancing (inaugurated in 1931) to over \$1,000,000,000.

\$9,000,000 per annum has already been saved in interest charges and when this year's operations are concluded, the annual saving in interest will be about \$14,000,000. This saving more than offsets interest charges on debt incurred to meet the extraordinary burdens incident to unemployment relief and eventually should enable the government to reduce taxes. The tenor of the comments from bankers, insurance and trust company executives, industrialists, agriculturists and labour leaders is abundantly summed up by the unanimity of their opinions, which are that Canada has emerged from the depression with less strain than that experienced in many other countries; and that, while our progress is gradual, it is well founded. There have been no disturbing recessions consequent upon too rapid a rise.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

FOOD IDEAS

GREEN TOMATO PICKLE

To make tomato pickle take 4 quarts of green tomatoes, small onions, and 4 green peppers. Slice the tomatoes and onions, sprinkle with 1/2 cup of salt and leave overnight in a crock. The next morning drain off the brine. Put in a preserving kettle one quart of vinegar, one level teaspoon each of black pepper, mustard seed, celery seed, cloves, allspice and cinnamon, and three-quarter cup of sugar. Bring to a boil and add the prepared tomatoes, onions and peppers; cook slowly for thirty minutes, fill the jars and seal them.—Preserving Fruits Bulletin, Dominion Dept. of Agriculture.

The Canadian Bank of Commerce at Hairy Hill is just \$8,500 short in cash as the result of the armed robbery by three unknown bandits Friday. Police of the R.C.M.P. forces are working diligently on the case and a manhunt of the first magnitude is taking place in the district.

It is thought the robbers were all experienced crackmen and much interest is taken by the public in their identity. It is said the men left no trace of their identity and police are puzzled by their disappearance so completely.
